HSC

MEMORANDUM FOR: The Task Force

SUBJECT : 12 September HSC Subpoena

1. Mr. Wilderotter of the White House has indicated that the Agency should continue to assemble information requested in the 12 September subpoena from the HSC. He has asked that we identify in the documents we produce those portions bearing directly on sources and methods which might need to be deleted.

2. Pursuant to these instructions it is suggested that two versions of the documents be passed to the Review Staff. One set would be a sterilized version protecting sources and methods and one would be an unexpurgated set for Agency and White House use.

3. Discussions with [] of the IC Staff indicate that items five and six requested by the subpoena are documents belonging to the Pentagon and the State Department respectively. The HSC will be told subsequently to direct their requests for those documents to them directly.

STAT

4. The DDI is continuing to work on the other requests contained in the subpoena. They contend that it does not correctly identify some of the documents in question, perhaps indicating that HSC sources are operating on the basis of their memory. We will continue to work against the 17 September deadline, pending further instruction from the White House.
